Abstract

Ever wondered how to get your favorite items in the Real-world to Metaverse? Or maybe your own 3D avatar to your favorite metaverse game? You have come to the right place. With Renderverse, you can replicate any real-world object and mint them as NFT's in Metaverse.

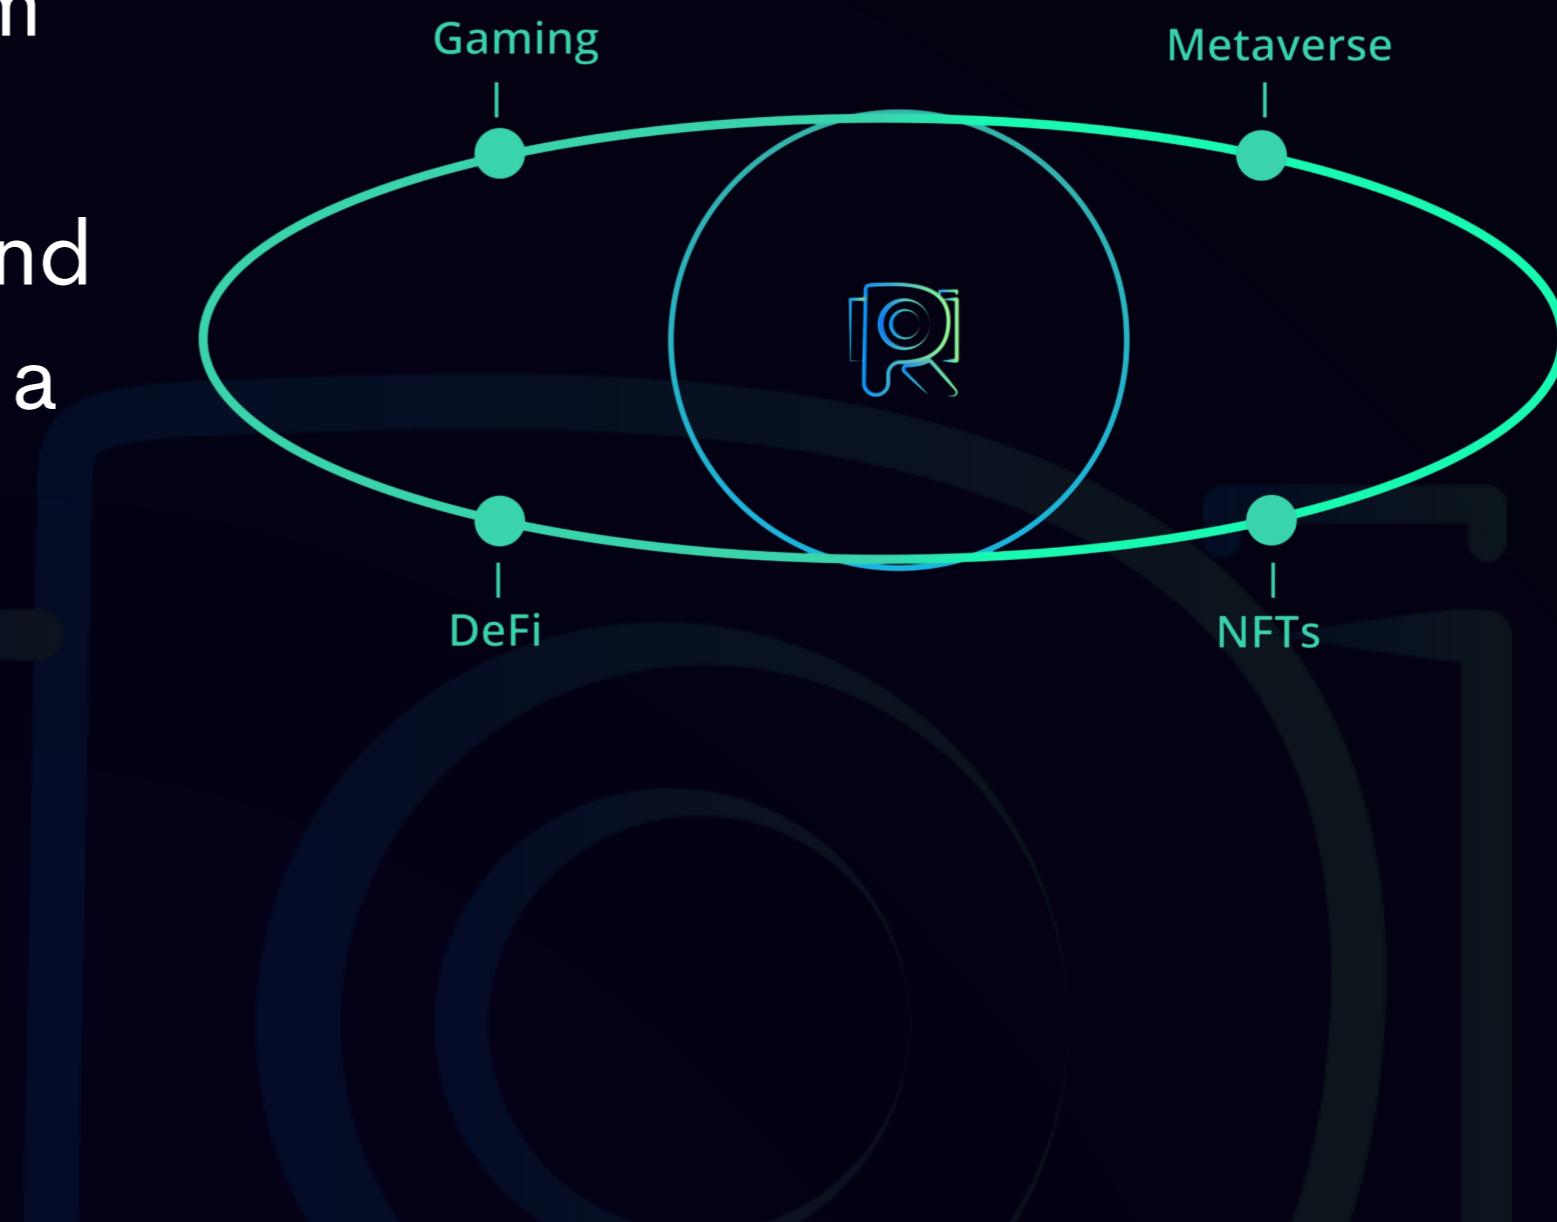

RenderScan app lets you create NFT's of Real-world objects with a single click and enables you to trade them in Renderverse Marketplace. In order to integrate key decentralized components with metaverse, our team has built Render-ecosystem which allows users at any level to earn passive income while using.

With our easy-to-use RenderScan app, we hope to remove the barriers that prevent users from entering the world of NFTs and Metaverse.

What is Renderverse?

Renderverse is a multi-dimensional ecosystem that encompasses a number of products, the most important of which being RenderScan and the technology that powers it. RenderScan is a cross-device Augmented Reality application that scans objects in the real world and mints them as NFTs in Metaverse

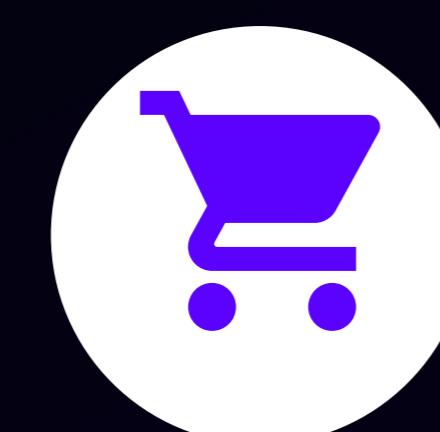

Renderverse Ecosystem

RenderScan

Deep-learning based scanner application which lets you scan real world objects and port them to metaverse

RenderMarket

An NFT marketplace where users can buy, sell and mint their NFT's using \$RNDV token

RenderFI

DeFI, staking and farming to earn passive yield on your \$RNDV tokens

RenderPlay

Online multiplayer p2p gaming powered by render gaming engine

RenderStore

Shop your favorite Merchandise in our Online stores and physical outlets

Market Potential

\$220 Billion
Gaming

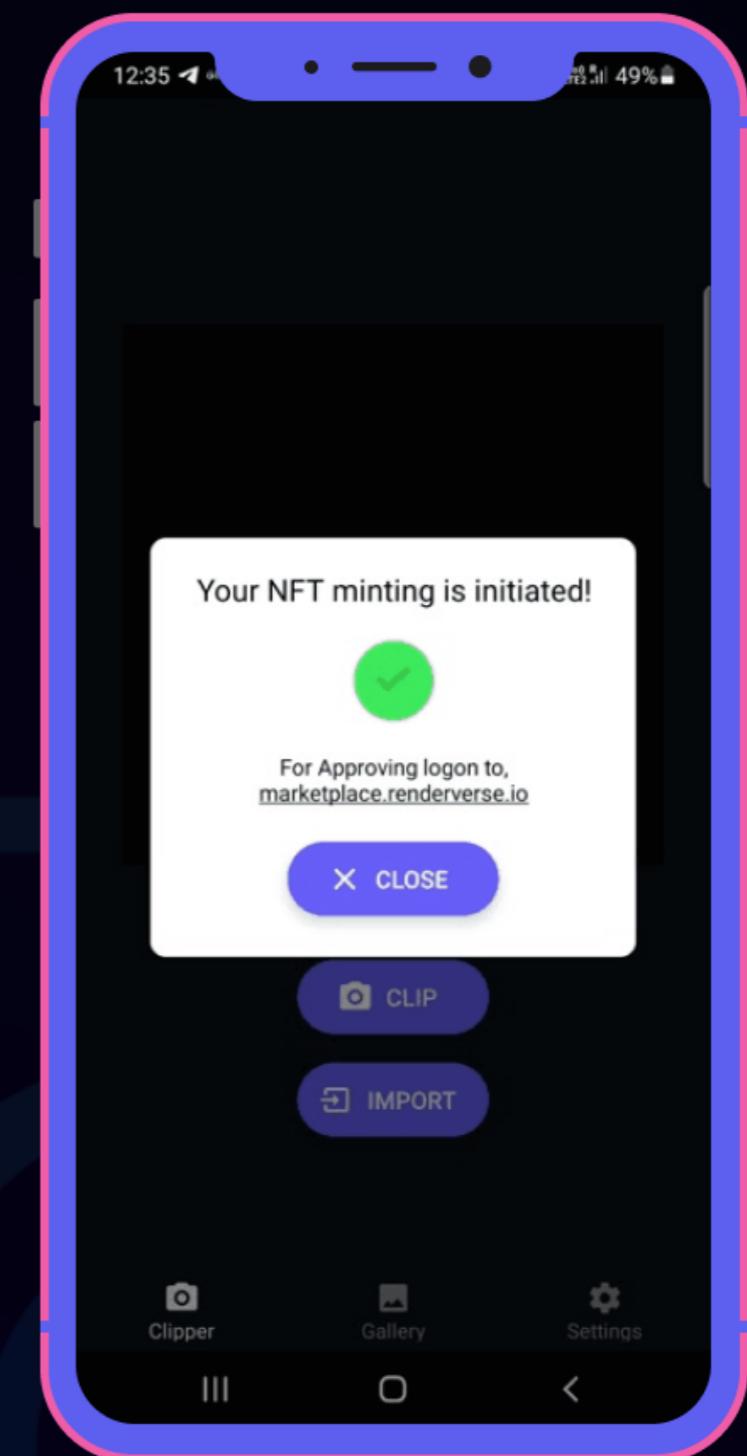

\$80 Billion
Metaverse
and NFT's

\$220 Billion
E-commerce
Merchandise

RenderScan Application

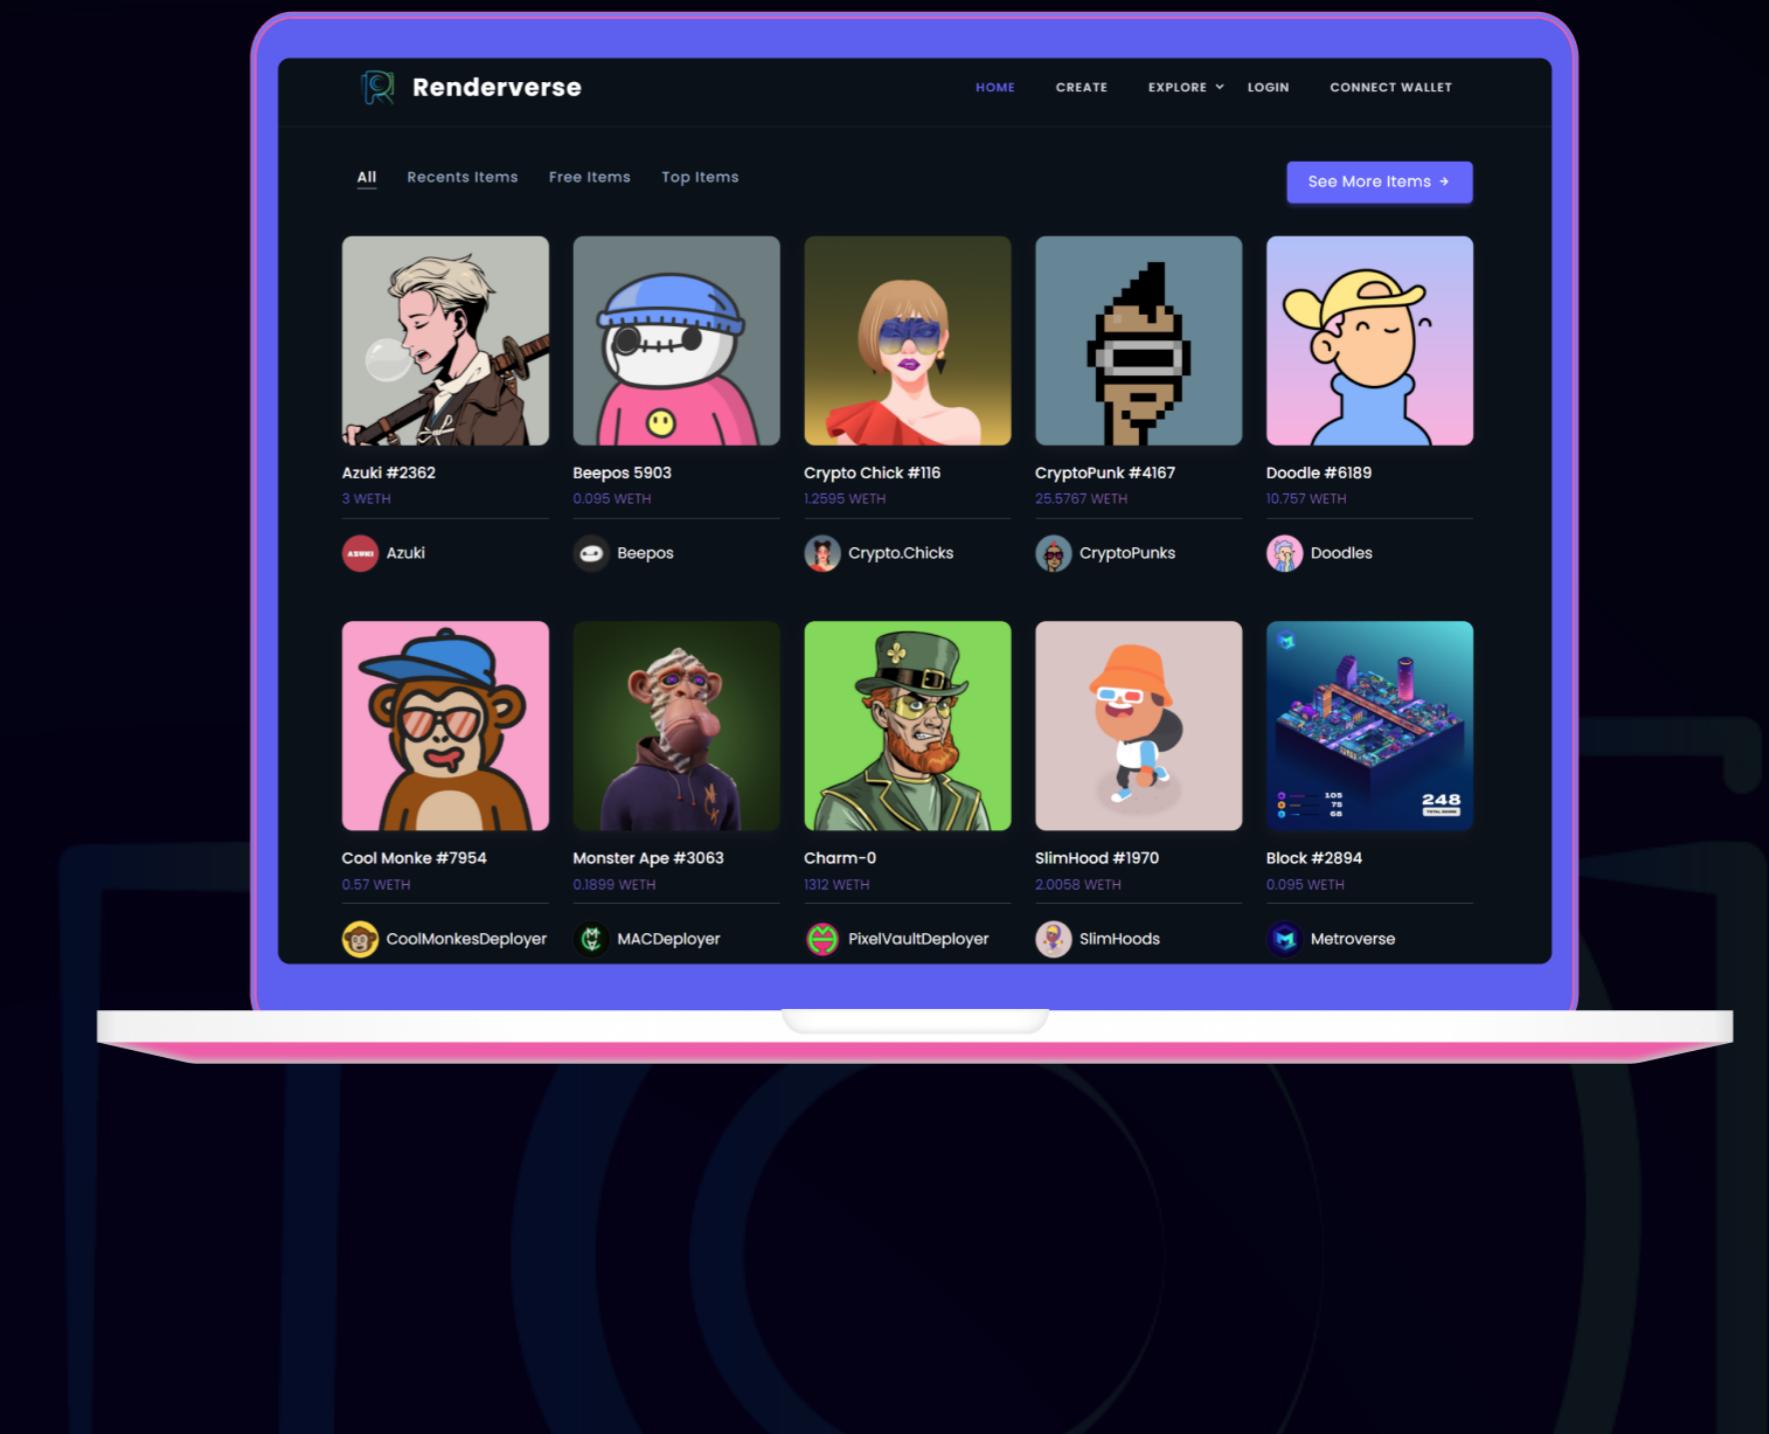

- Renderverse lets you create NFTs from the real-world objects within seconds simply by clicking a snap on our RenderScan Application
- We bring state-of-the-art 3D scanning and powerful modeling technology ready to run on your smart device and generate ultra-realistic 3D avatars and virtual objects that can be used in the metaverse
- Our Multi-level Deep learning model will evaluate the snap clicked on your mobile and identify the objects with high precision. This cutting-edge technology was extensively developed and tested by RenderVerse engineers
- RenderVerse app will be available both for Android and IOS

RenderMarket

- RenderMarket is a decentralized NFT marketplace where users can buy, sell and mint their NFT's.
- Users can mint their favorite 2D,3D scanned images, avatars etc. NFT's with a single click on the RenderScan app and trade them in the RenderVerse Marketplace
- Our app lets users customize their images with advanced editing tools and framework before minting them as NFT's

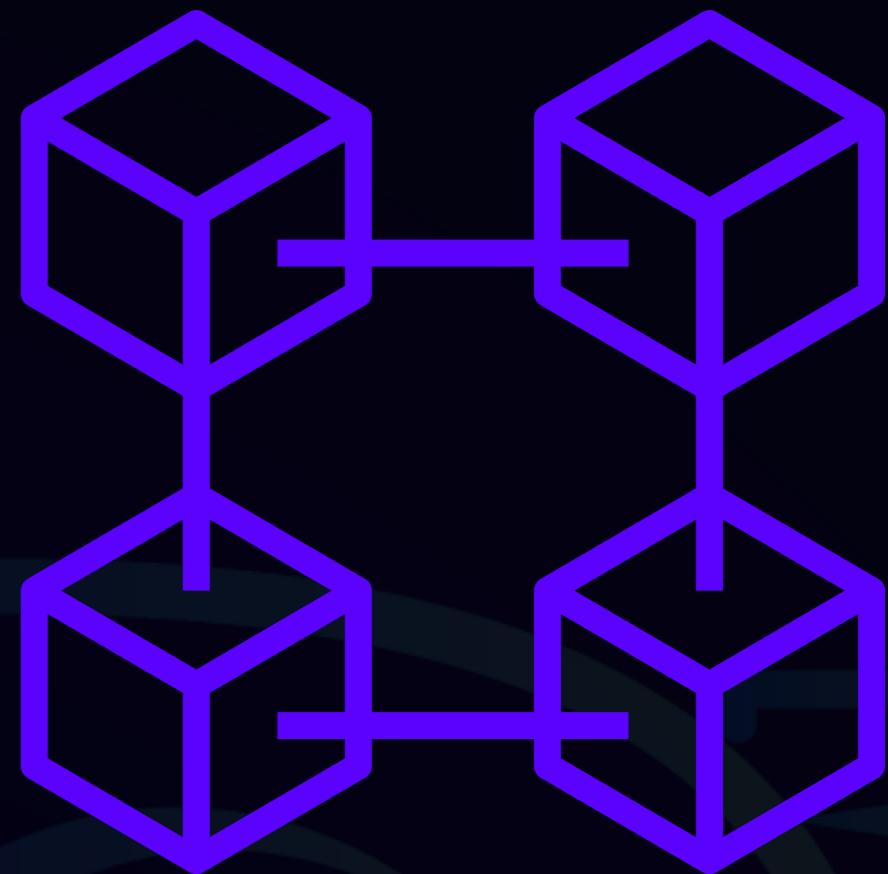

RenderFi

Holders of our \$RNDV tokens will be able to leverage from our various DEFI components –

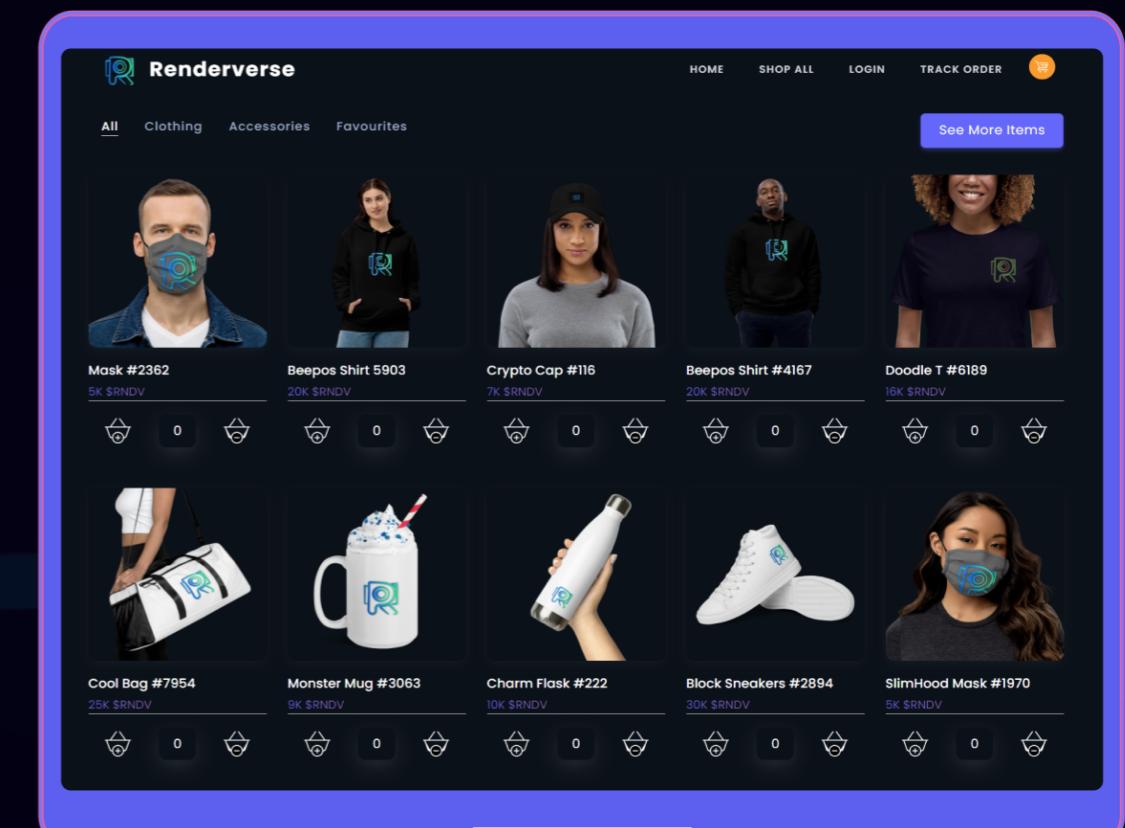

- Staking – Stake your \$RNDV tokens to earn passive yield with attractive APY
- Farming – Farm \$RNDV tokens by providing liquidity to \$RNDV pools on DEX

Renderverse will aid in continuously fueling the staking pool at the same time maintaining a decent ROI for our users as the ecosystem develops

RenderStore

- RenderVerse will have its own online merchandise platform where users can buy the physical goods like shirts, t-shirts, caps and various accessories with their digital NFT's printed on them
- In the future, RenderVerse is aiming to provide franchisees to businesses across the world where RenderVerse merchandise will be sold
- \$RNDV token will be used as a native token in RenderStores

RenderPlay

- RenderVerse aims to enter the GameFi sector that combines gaming and DeFi
- RenderPlay contains several P2P and multiplayer games like scavenger hunt, tournaments etc. that can be participated through holding \$RNDV tokens
- RenderVerse does not see any other GameFi projects as competitors, instead will find its place in the GameFi community and help build and contribute towards the GameFi industry.

RenderToken Utility

- Render tokens (RNDV) is a utility token powering RenderVerse ecosystem
- \$RNDV facilitates users to access premium features like unlimited scans, editing tools in the RenderScan application
- \$RNDV allows users to buy and sell NFTs on the RenderMarket
- \$RNDV lets users participate in multiplayer p2e games on the RenderPlay platform
- \$RNDV enables users to buy the merchandise in the RenderStore and also encourages businesses to open physical franchisee stores
- Users can leverage DEFI protocols to earn passive yield on their \$RNDV tokens

RoadMap

\$RNDV Token

Token Name - Renderverse

Token Ticker - \$RNDV

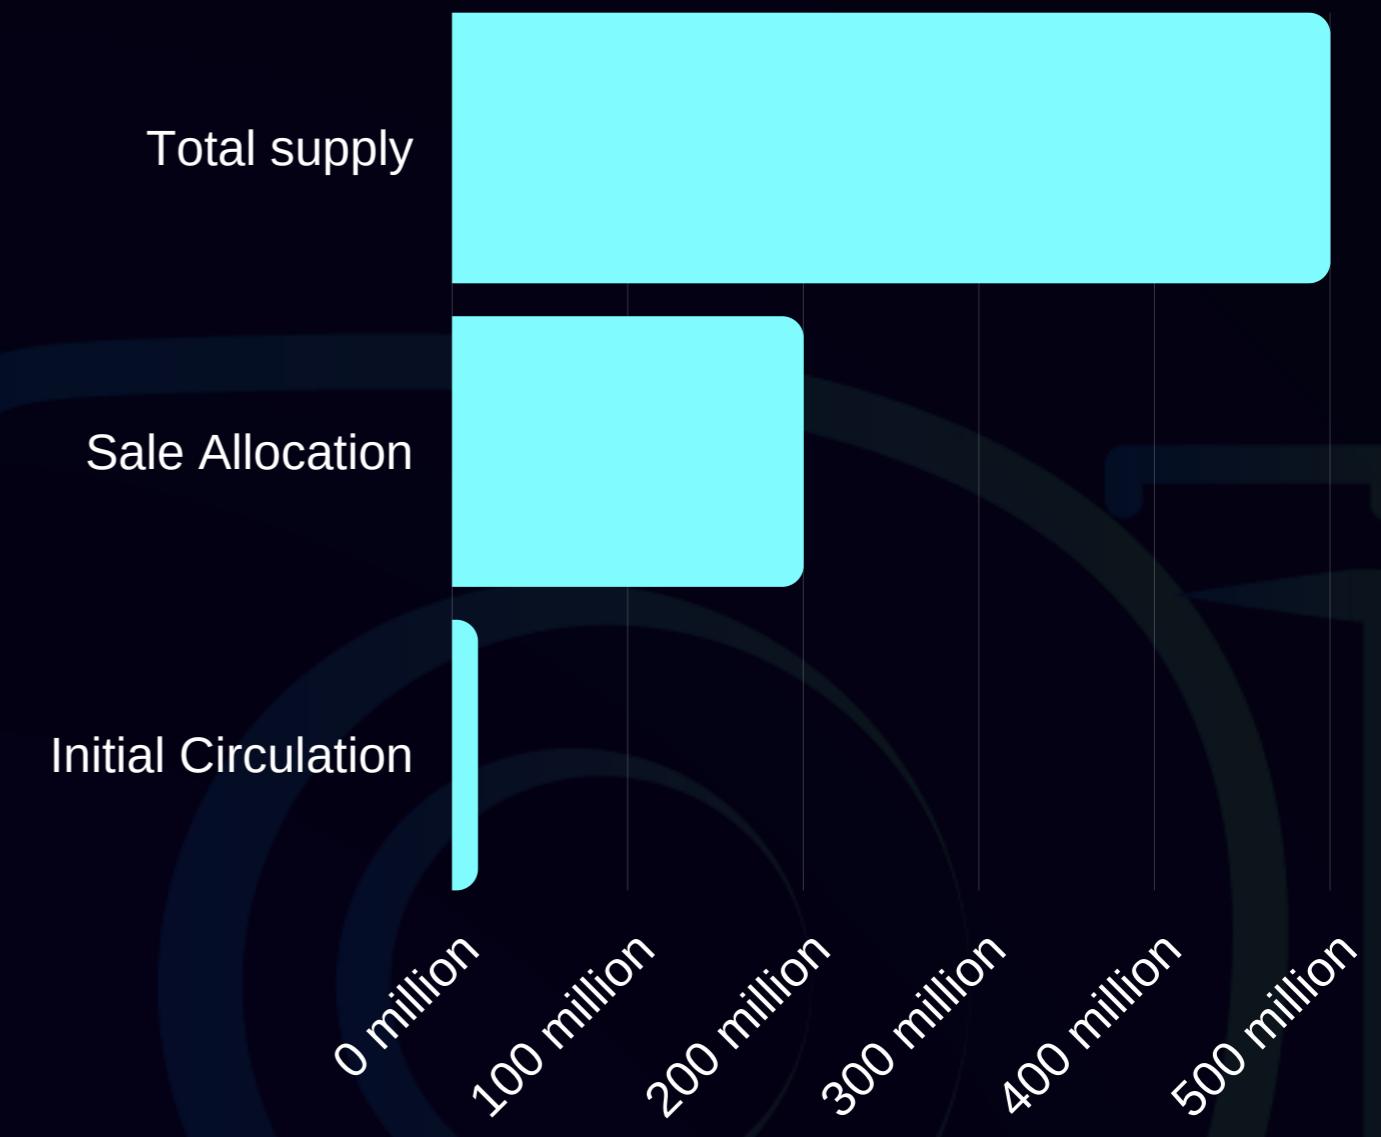

Network - Binance Smart Chain

Token type - Utility

TOTAL TOKEN SUPPLY - 500 MILLION

ALLOCATED FOR SALE - 200 MILLION

INITIAL CIRCULATION - 63.5 MILLION

Tokenomics

Category	Tokens	Vesting release
Sale	40%	See Vesting section (pg. 7)
Company Reserve	8%	5% over 20 months
Rewards	12%	5% over 20 months
Community treasury	7%	5% over first 10 months and 10% over next 5 months
Team and Advisors	15%	6% over first 5 months, 7% over next 5 months and 5% over next 7 months
Marketing and Operations	10%	on-demand
Liquidity and Listings	8%	on-demand
